Tools: Linux, GitHub, VS Code, IntelliJ, Unity,
Docker, Maven
Others: REST APIs, MVC , Clean Architecture ,
Microservices

PROJECTS

Conserve The Deep - An underwater species conservation platform

A web platform that connects users with the marine life and conservation needs of the Bay of Bengal. Through interactive exploration and a pollution-cleanup game, it educates users on biodiversity, conservation, and environmental impact.

Gomoku

A Python implementation of the classic Gomoku (Five in a Row) game with an AI opponent using the Minimax algorithm and Alpha-Beta pruning optimization. The game features a Pygame-based graphical interface.

Data Structure Simulator

The Data Structure Simulator(DSS) is designed to provide a visual and interactive learning experience for users to understand various data structures and sorting algorithms. The simulator aims to help beginners and students grasp the underlying concepts of fundamental data structures like stack, queue, graph, trees and sorting techniques, such as bubble sort, insertion sort, merge sort etc.

ACTIVITIES AND ACHIEVEMENTS
